

Lucernario aerante[®] INOX

For lightwells

Openable.

For swimming pools

How it works

The openable *Lucernario aerante INOX* collects rainwater from its runoff channel and **permits ventilating the motor compartment** through the air intake. The constant flow of air and the action of the extractor ensure the motor compartment breathes better. Humidity is considerably reduced and, consequently, so is the **risk of system breakdowns**.

The air intakes, which are **always open**, are protected by **anti-insect and anti-dirt nets**. Simply lift the grid to clean the runoff channel.

The finishes

The openable *Lucernario aerante INOX* is made of **AISI 316** semi-matt steel for a **modern look** and **high resistance to oxidation**.

The walk-on glass provides natural light and ensures safe transit thanks to its **R11 non-slip pattern**.

These installation diagram is provided as examples.
We recommend you consult a professional who can define the ideal realisation of your floor.

Size guide

Longitudinal section (Y)

Cross-section (X)

Available dimensions

Model	Dimensions	Luminous compartment		Base hole	Weight
	A, B	C, D	CxD(cm ²)	E, F	Kg
